*West Basin – Providing a safe and reliable supply of high-quality water to the communities we serve.*

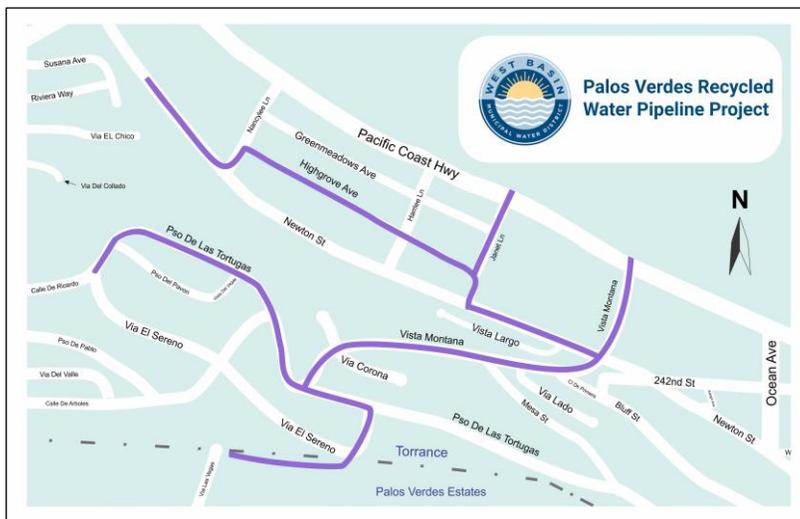

West Basin Municipal Water District is constructing a new recycled water pipeline that will expand recycled water use in the City of Torrance and bring the first drop of recycled water to the Palos Verdes Peninsula.

### What to Expect

Pre-construction activities, including survey work and potholing (boring activity to confirm location of underground utilities), are expected to begin October 12 and continue through late November.

- Intermittent lane closures, parking restrictions and turn restrictions required in order to safely conduct activities; “No Parking” signs posted in advance
- Through-traffic will be maintained at all times
- Local access to Vista Montana for residents on Vista Largo, Via Lado and Via Corona will be maintained at all times
- Access to driveways and businesses maintained at all times
- No disruption to utility and trash services

### Location

Work will occur at the intersection of Anza Avenue and PCH, continue south on Vista Montana and include the following streets: Newton Street, Janet Lane, Highgrove Avenue, Nancy Lee Lane, Paseo De Las Tortugas, Calle De Ricardo and Via El Sereno.

### Background

The Palos Verdes Recycled Water Pipeline Project is a new 3.5-mile-long recycled water pipeline that will connect to West Basin’s existing system at Anza Avenue and Calle Mayor in Torrance and deliver recycled water for irrigation purposes to Lago Seco and Los Arboles “Rocketship” Parks, Richardson Middle School, Riviera Elementary School, medians on PCH and Anza Avenue and the Palos Verdes Golf Club. The project also includes a booster pump station located at Lago Seco Park in Torrance that will store the pumps needed to carry recycled water to higher elevations.
